TROPICAL CYCLONE BULLETIN NR. 23F
Low Pressure Area (formerly "BASYANG")

Issued at 5:00 AM, 07 February 2026

BASYANG WEAKENED INTO A LOW PRESSURE AREA WHILE MOVING WESTWARD OVER SULU SEA.

Location of Center (4:00 AM)

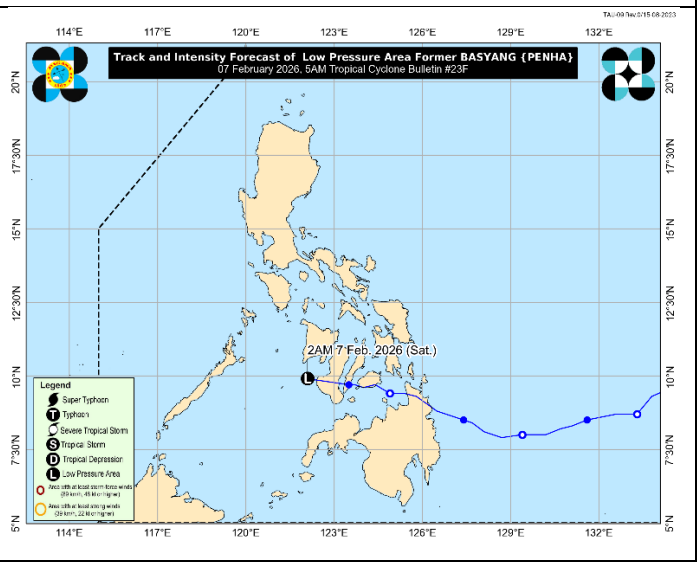
The Low Pressure Area (formerly "BASYANG") was estimated based on all available data at **105 km Southeast of Cuyo, Palawan (10.1°N, 121.6°E).**

Intensity

Central pressure of **1006 hPa**

Present Movement

Westward at 25 km/h



TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal is currently hoisted

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 32 issued at 5:00 AM today for the heavy rainfall outlook due to the Low Pressure Area (formerly "BASYANG") and Shear Line.

Severe Winds

The surge of the Northeast Monsoon will also bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Most of Luzon, Western Visayas, most of Negros Island Region, and Zamboanga del Norte.
- **Tomorrow (08 February):** Most of Luzon, Aklan, and Antique.
- **Monday (09 February):** Most of Luzon, Northern Samar, northern portion of Eastern Samar, northern portion Samar, Biliran, the northern portion of Cebu, Negros Occidental, and Western Visayas.

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m:** The seaboards of Batanes
- **Up to 4.5:** The northern seaboard of Babuyan Islands
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The remaining seaboards of Babuyan Islands; the seaboards of Ilocos Norte.
- **Up to 3.0 m:** The seaboards of Ilocos Sur, Cagayan, Isabela, Aurora, northern Quezon; the northern and eastern seaboards of Polillo Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboards of Ilocos Region; the northern seaboards of Camarines Norte and Camarines Sur; the northern and eastern seaboards of Catanduanes and Northern Samar; the eastern seaboards of Albay, Sorsogon, Eastern Samar, Dinagat Islands, Siargao-Bucas Grande Islands, Surigao del Sur, and Davao Oriental.
- **Up to 2.0 m**: The eastern seaboard of Davao Occidental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

Due to unfavorable environmental conditions, BASYANG weakened into a low pressure area at 2:00 AM today. The remnant low will move generally west northwestward over the Sulu Sea and cross the northern Palawan. However, as the remnant low moves over increasingly less favorable environmental conditions, there is a likelihood that it may dissipate over the Sulu Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development occur, this is the final bulletin for this weather disturbance.
